

Report
Of
WEB DEVELOPMENT INTERNSHIP

Submitted
To
School of Computer Science and Engineering
IILM University, Greater Noida, U.P.

In partial fulfilment of the requirement of degree of
B.Tech CSE

By
Name of Student :- RAVI RAJ
Roll No of Student :- 25SCS1003003613
Batch: 2025 – 2029

Academic Year: 2026 – 2027

1. CANDIDATE'S DECLARATION

I, **RAVI RAJ** do hereby declare that the internship report titled “**WEB DEVELOPMENT INTERNSHIP**” has been completed by me to fulfil the requirement for the award of the degree of Bachelor of Technology in CSE. All the references have been quoted and I have not taken as such any material from any other source. I affirm to you that this report is my own and has not been submitted to any other institute for any degree/ diploma requirement and further I shall be solely responsible for any kind of copyright violation in this regard.

Student Name :- RAVI RAJ

Roll No. :- **25SCS1003003613**

2. ACKNOWLEDGEMENT

I would like to express my sincere gratitude to everyone who supported and guided me throughout my Web Development Internship at Prodigy InfoTech.

This internship provided me with an opportunity to strengthen my practical knowledge of web development and apply my understanding of HTML, CSS and JavaScript through practical projects.

I am thankful to IILM University, the faculty members and Prodigy InfoTech for providing me with this learning opportunity. I am also grateful to my parents for their continuous support and encouragement throughout this internship.

The experience gained during this internship has helped me improve my practical web development skills, problem-solving ability and confidence in working on web-based projects.

4. PROJECT DESCRIPTION

4.1 INTRODUCTION

The Web Development Internship at Prodigy InfoTech provided an opportunity to gain practical experience in front-end web development. During the internship, I worked on five assigned web development tasks using HTML, CSS and JavaScript.

The projects developed during the internship were a Responsive Landing Page, Stopwatch Web Application, Tic-Tac-Toe game {Web Application}, Personal Portfolio Website and Weather Application.

These projects provided practical exposure to webpage structure, styling, responsive design, JavaScript-based interaction and API integration. Each task was developed according to its given requirements and tested in a web browser.

The internship helped me understand how basic web technologies can be combined to create interactive and user-friendly web applications.

4.2 ORGANIZATION PROFILE

Prodigy InfoTech provided the opportunity for this Web Development Internship. I joined the organization as a Web Development Intern for an educational internship program.

The internship provided practical learning through assigned web development projects. During the internship, I worked on different tasks involving HTML, CSS and JavaScript and developed web-based applications according to the given requirements.

The internship was focused on practical learning, project development and improving technical skills through hands-on work.

4.3 PROBLEM STATEMENT

The internship required the development of different web-based applications according to specified requirements. The main problem was to implement the required functionality while maintaining a simple, responsive and user-friendly interface.

The assigned tasks covered different areas of web development. These included creating a responsive landing page, implementing a stopwatch, developing an interactive Tic-Tac-Toe game, creating a personal portfolio website and developing a weather application that retrieves weather information through an API.

The challenge was to understand each requirement and implement the required functionality using HTML, CSS and JavaScript.

4.4 PROJECT OBJECTIVES

1. To gain practical experience in front-end web development.
2. To strengthen knowledge of HTML, CSS and JavaScript.
3. To create responsive and user-friendly web interfaces.
4. To implement interactive functionality using JavaScript.
5. To develop web applications according to given requirements.
6. To understand basic API integration through the Weather Application.
7. To improve practical problem-solving skills.
8. To gain experience in developing and testing web projects.

4.5 SCOPE OF THE PROJECT

The scope of the internship was focused on front-end web development and basic API integration.

The completed projects demonstrate different aspects of web development, including responsive webpage design, interactive JavaScript functionality, game development, personal portfolio development and retrieving weather information through an API.

The projects provide a practical foundation for further learning and development in web technologies. The applications can also be enhanced with additional features in the future as technical knowledge increases.

4.6 TECHNOLOGIES AND TOOLS USED

4.6.1 HTML5

HTML5 was used to create the basic structure and content of the web pages. It was used for headings, paragraphs, buttons, forms, navigation elements and other webpage components.

4.6.2 CSS3

CSS3 was used for styling and designing the web applications. It was used to create layouts, colors, spacing, responsive designs, cards, buttons, animations and visual effects.

4.6.3 JavaScript

JavaScript was used to add interaction and functionality to the web applications. It was used for features such as stopwatch controls, Tic-Tac-Toe game logic, interactive portfolio elements and fetching weather information.

4.6.4 Weather API

A weather API was used in the Weather Application to retrieve current weather information. The application fetches weather data based on the searched city or the user's current location and displays the information on the webpage.

4.6.5 Visual Studio Code

Visual Studio Code was used as the code editor for creating and editing the HTML, CSS and JavaScript files.

4.6.6 GitHub

GitHub was used to store and manage the project source code and to make the completed projects available online.

4.7 SYSTEM ARCHITECTURE

The developed applications primarily follow a client-side web application architecture. HTML provides the structure of the application, CSS provides the visual design and responsive layout, and JavaScript handles the interaction and application logic.

In the Weather Application, JavaScript communicates with the weather API to retrieve weather information. The received data is then processed and displayed on the webpage.

4.8 METHODOLOGY

The internship projects were developed step-by-step according to the requirements of each assigned task.

Step 1 – Understanding Requirements :-

The requirements of each task were studied before starting development.

Step 2 – Creating Structure :-

HTML was used to create the basic structure of each application.

Step 3 – Designing the Interface :-

CSS was used to style the applications, create layouts and improve responsiveness and visual appearance.

Step 4 – Adding Functionality :-

JavaScript was implemented to provide the required interactive functionality.

Step 5 – API Integration :-

The Weather Application was connected to a weather API to retrieve weather information.

Step 6 – Testing :-

The applications were opened and tested in the browser to verify their functionality.

Step 7 – Deployment/Submission :-

The completed project files were uploaded to GitHub for project management and submission.

4.9 EXPECTED OUTCOMES

Task 1 – Responsive Landing Page

A responsive landing page was developed using HTML, CSS and JavaScript. The page includes a navigation menu, content sections and interactive styling. The project demonstrates responsive webpage design and navigation interaction.

Figure 1 : Responsive Landing Page

Task 2 – Stopwatch Web Application

A Stopwatch Web Application was developed using HTML, CSS and JavaScript. The application provides stopwatch functionality through interactive controls and demonstrates the use of JavaScript for time-based interaction.

Figure 2 : Stopwatch Web Application

Task 3 – Tic-Tac-Toe Web Application

A Tic-Tac-Toe Web Application was developed using HTML, CSS and JavaScript. The application provides an interactive game interface and demonstrates the implementation of game logic and user interaction using JavaScript.

Figure 3 : Tic-Tac-Toe Web Application

Task 4 – Personal Portfolio Website

A Personal Portfolio Website was developed to present personal information, skills, projects and educational details in a responsive interface. The website was designed using HTML and CSS with JavaScript-based interactions and animations.

Figure 4 : Personal Portfolio Website

Task 5 – Weather Application

A Weather Application was developed using HTML, CSS and JavaScript. The application allows the user to search for a city and retrieve current weather information through a weather API. It also provides an option to use the user's current location.

The application displays information such as temperature, weather condition, humidity and wind speed.

Figure 5 : Weather Application

Overall Outcome

The completion of these five projects provided practical experience in developing webbased applications using HTML, CSS and JavaScript. The projects helped in understanding responsive design, user interaction, JavaScript functionality and basic API integration.

Prodigy InfoTech

Dear Ravi Raj,

We extend our warmest congratulations on your successful completion of the Web Development internship program at Prodigy InfoTech. It is with great pleasure and pride that we acknowledge your hard work, dedication, and remarkable achievements throughout your internship journey.

As a token of appreciation for your outstanding performance, we are pleased to present you with a Certificate of Completion. This certificate not only recognizes your successful completion of the internship but also serves as a testament to your commitment and capabilities. You can verify the authenticity of your certificate by scanning the provided QR Code on the Certificate.

We encourage you to share your achievement on LinkedIn to showcase your dedication and accomplishments to your professional network. Posting your certificate on LinkedIn is a great way to enhance your profile and demonstrate your commitment to personal and professional growth. Don't forget to tag Prodigy InfoTech and use the hashtag #ProdigyInfoTech in your post to ensure we see and celebrate your success.

[Add to profile](#)

We wish you the very best as you embark on the next chapter of your journey. Your hard work and determination have set a strong foundation for your future success. We have no doubt that you will continue to achieve great things.

Once again, congratulations on a job well done! We are proud to have had you as part of our team and wish you all the success and happiness that the future holds.
